

SOLARIS

Textile Façades

Textile facades are made of tensioning net fabrics.

Solaris' textile facades can give to the building a peculiar design through the use of different shapes and colors, which can adapt to every building, whether it's new or renovated.

Fabrics can be printed, turning the whole façade into a mean of communication.

«Pianos Hanlet»

Here you can see a textile façade by night.

Transparency creates a peculiar atmosphere both on the inside and on the outside

«Ghota Cosmetics by night – iarchitects»

Using led bars, the façade can become extraordinary.

«Ghota Cosmetics »

The textile façade is made with a micro-perforated material, available with different opening degrees. The façade is designed and made with fabrics and materials that will last more than 20 years.

Solaris uses many different technologies to secure and stretch fabrics according to the architecture and the effect you want to obtain.

Our team of experts perform the calculation and, if necessary, the simulation of the performance of the whole membrane so to guarantee the wind resistance. We guarantee the stability of our textile facades even in extreme weather conditions.

SOLARIS

Solaris Tende offers a tailor-made product, which is designed to satisfy every type of need. Solaris makes both standard and customized products with the same attention.

We create unique solutions. Our multidisciplinary approach requires the ability to understand the various technical and esthetical languages considering both objective and subjective factors, such as the different requirements of the specific environments.

So, we analyze the light and heat changes during the day, the different weather conditions change through the year and the seasons passing.

Solaris, much more than a simple textile façade!
